Writing a simulation model...

Reduce your overhead code!

Writing a simulation model...

FAME

In a nutshell

FAME organises

- Data exchange
 - Execution order
 - Input & Outputs
 - Parallelisation
- **Write less code**

FAME offers flexible

- Input
 - Output
 - Agent interactions
- **Configure, not code!**

FAME is portable

- Windows / Linux / Mac
 - Laptop / Server / HPC
- **Scale to your needs**

FAME helps @ model

- Coding
 - Configuration
 - Execution
- **Full lifecycle support**

Check out our poster!

Imprint

Topic: FAME – open Framework for distributed Agent-based Modelling of Energy systems

Date: 23.03.2023

Author: Christoph Schimeczek

Institute: Institute of Networked Energy Systems
