

GeoServer Monitor PostgreSQL Extension

Persist the monitoring metrics of your GeoServer in a PostgreSQL database

Imagine an instance of ...

Several workspaces

Hundreds of layers

In use for 5+ years

Admins of the instance

Frequently requested layers?

Power users?

Slow layers

Unused layers?

„Ghost“ applications?

...

GeoServer Monitor PostgreSQL Extension

Persist the monitoring metrics of your GeoServer in a PostgreSQL database

Imagine ...

Several workspaces

Hundreds of layers

In use for 10+ years

Solution? → Monitoring!

Admins of the instance

Frequently requested layers?

Power users?

Slow layers

Unused layers?

„Ghost“ applications?

...

GeoServer Monitor PostgreSQL Extension

Persist the monitoring metrics of your GeoServer in a PostgreSQL database

Existing options for monitoring:

<u>Monitoring extension</u>	Memory Storage	Stores metrics of the last 100 requests; volatile storage
	Audit Logging	Requires secondary application(s) to process the audit logs
Hibernate extension		Unavailable for the recent versions of GeoServer; unmaintained

GeoServer Monitor PostgreSQL module (open source)

Link: <https://github.com/DLR-TS/GeoServer-Monitor-PostgreSQL>

- Extends the GeoServer monitoring extension
- Simple, low-level approach to write monitoring metrics to a PostgreSQL database
- Lesser dependency on external modules; thus easy to maintain and update

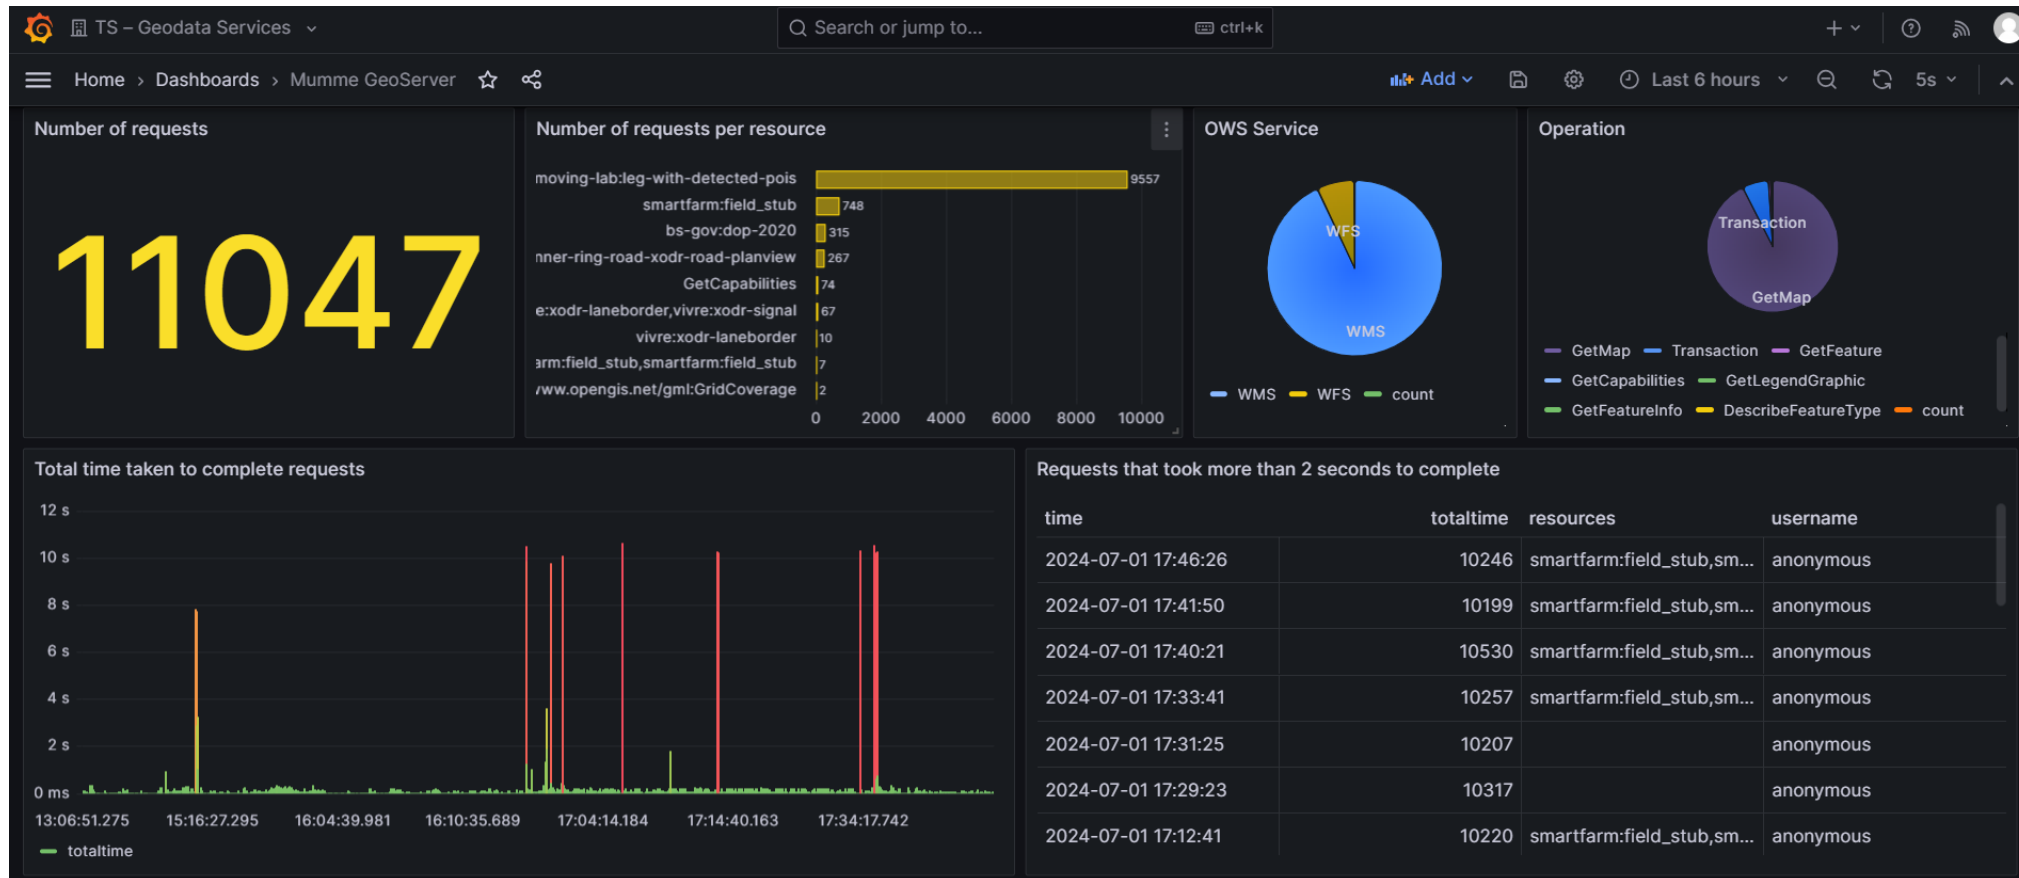

GeoServer Monitor PostgreSQL Extension

Persist the monitoring metrics of your GeoServer in a PostgreSQL database

Deployed in DLR-TS and operational since October 2022. Metrics are visualized on Grafana.

Topic: **GeoServer Monitor PostgreSQL Extension** – Persist the monitoring metrics of your GeoServer in a PostgreSQL database.
